

INTEGRATED EMI / RFI FILTERING

FILTERED CONNECTORS

Connector-level filtering engineered for demanding aerospace and defense systems.

RCV INTERCONNECT

ONE OF THE SHORTEST LEAD TIMES IN THE INDUSTRY

ENGINEERED AROUND YOUR REQUIREMENTS

RCV filtered connectors combine the mechanical interface and EMI filtering in one purpose-built component. We work directly with your team to align capacitance, layout, shell style, termination and environmental requirements with the real application.

CONFIGURATIONS

- MIL circular connector platforms
- D-Sub and Micro-D platforms
- Custom capacitance configurations
- Pin, socket, solder and PC-tail terminations

APPLICATIONS

- Avionics and flight controls
- Communications equipment
- Electronic warfare systems
- Ground and airborne defense platforms

KEY ADVANTAGES

- Filtering at the system interface
- Reduced downstream component burden
- Direct engineering collaboration
- Fast, responsive program support

LET'S DISCUSS YOUR DESIGN

MADE IN THE USA

AS9100D & ISO 9001 CERTIFIED
