

ROUTING WITHOUT COMPROMISE

FLEX INTERCONNECTS

Flexible interconnect solutions for tight, complex assemblies.

RCV INTERCONNECT

ONE OF THE SHORTEST LEAD TIMES IN THE INDUSTRY

ENGINEERED AROUND YOUR REQUIREMENTS

RCV flex interconnects reduce wiring complexity and help engineering teams route signals through confined or irregular spaces. Solutions can combine connector interfaces, filter components and application-specific geometry in a lightweight, repeatable assembly.

CONFIGURATIONS

- Custom flex geometry
- Connector-to-flex assemblies
- Filtered flex solutions
- Application-specific terminations

APPLICATIONS

- Space-constrained avionics
- Missile and launch systems
- Sensors and electronic modules
- High-density electronics

KEY ADVANTAGES

- Reduced wiring volume
- Repeatable routing
- Lower assembly complexity
- Lightweight packaging

LET'S DISCUSS YOUR DESIGN

MADE IN THE USA
