
PC-Tail Connector Configuration

Quote preparation worksheet | RCV Interconnect

Provide available details. Mark unknown items for engineering review. Attach drawings separately.

1 Contact and program

Company / contact

Email / phone

Quantity / prototype or production

Target delivery / program

2 Connector interface

Family / exact series / part number

Drawing number / revision / mating connector

Shell size / receptacle or mounting style

Insert arrangement / contact count

Pin or socket / contact sizes

Keying / orientation / material and finish

3 Tail and board dimensions - include units and tolerances

A Tail diameter / cross-section

B Exposed tail length from rear datum

C Rear datum to PCB entry face

PCB thickness / finished hole pattern

D Guide thickness

Guide hole pattern / orientation / clearances

4 Assembly, environment, and documentation

Solder process / electrical requirements / environment / required tests

Additional requirements or details needing engineering review

The guide slides along the tails; a fixed guide position is not specified by the customer.

Worksheet is for requirements review; it is not a manufacturing drawing or compatibility approval.
