

COMPACT CONNECTOR-LEVEL FILTERING

PRESS-IN FILTERS

Flexible PCB filters engineered to press into the connector shell.

RCV INTERCONNECT

ONE OF THE SHORTEST LEAD TIMES IN THE INDUSTRY

ENGINEERED AROUND YOUR REQUIREMENTS

RCV press-in filters use a flexible polyimide PCB populated with surface-mount chip capacitors. Gold-plated contacts interface with connector pins, while perimeter tabs contact the inside of the shell to create compact, integrated EMI filtering.

CONFIGURATIONS

- Flexible polyimide PCB construction
- Surface-mount chip capacitors
- Gold-plated pin-hole contacts
- Gold-plated shell contact tabs

APPLICATIONS

- Connector manufacturers
- Filtered bulkhead interfaces
- Space-constrained electronics
- Legacy design upgrades

KEY ADVANTAGES

- Compact mechanical footprint
- Flexible integration approach
- Custom electrical configurations
- Production-minded design support
